The Newly Renovated Rack:

- Switching from Angle Iron to a **Galvanized Tube Steel Frame** led to lighter overall weight, elimination of wooden pallet, cheaper shipping costs and quicker installation.
- **Adjustable Brackets** on the back frame allows for The Rack to accommodate all styles of unit heaters, effortless installation and easier service entry.
- A completely redesigned **Control Panel** resulted in clear access to controls, straightforward wiring process and speedier service time.

**New Rack provides convenient carrying*

- Our New Control Panel will ship straight up. Once on the jobsite the panel will hinge down for wiring, service and easy access.
- Our Control Panel has **UL approved** fittings, whips, switches, terminal block and housing.

**Control Panel in Shipping Position*
